WORK EXPERIENCE

Betsol

Senior Software Engineer | *July 2017 - Present*

Projects:

ABI U: Internal Kaiser employee-facing application where all pages and data is manageable by an admin. I was the lead developer on the front-end, and back-end of this project.

LeTo: DevOps automation tool for building workflows using various plugins and triggers. I played a major role in the front-end and back-end API/workflow execution logic.

APDP: Database testing tool allowing ETL engineers to set up tests with HPQC and their databases all in one application. I set up the architecture of this project and built much of its front-end and back-end API functionality.

Tech: ReactJS, Redux, NodeJS, ExpressJS, PostgreSQL

Zayo Group

Application Developer | *Nov 2016 - July 2017*

Projects:

Tranzact: Customer facing web portal for Zayo customers. I built the full-stack payment solution for one-time and subscription-based payments for the Tranzact application. The payment feature was a full-stack solution. I also created various other features for the Tranzact application during my time at Zayo.

Tech: AngularJS, NodeJS, ExpressJS, Stripe, PostgreSQL, Heroku

Galvanize

Full Stack Web Developer/Resident | *Nov 2015 - July 2016*

- Assisted with the instruction of the Galvanize full-stack web development program.
- Pair programmed with students.
- Lectured on various web development topics.

Tech: AngularJS, ReactJS, NodeJS, ExpressJS, PostgreSQL, Heroku

EDUCATION

Galvanize

Full Stack Web Development Program | *April - Oct 2015*

- Immersive software development course that trains students to be skilled full-stack web developers
- 6 months of working 50-70 hour weeks building full-stack web applications independently and on teams

Tech: AngularJS, NodeJS, ExpressJS, MongoDB, Heroku
